Pre-proposal statement of inquiry – CR-101

- Nothing to report at this time.

Proposed rule-making order – CR-102

- **Chapter 173-434 WAC, Solid Waste Incinerator Facilities**

The purpose of the proposed rule change is to incorporate new federal language, change existing definitions, and provide alternative means of compliance. The amendment will make 40 CFR 60, subpart Eb, an alternative means of compliance. Redundant sections will be removed and editorial changes will be included. Creosote treated wood will be removed from the definition of "solid waste." The amendments will also provide facilities the option of an alternative regulatory scheme based on EPA's most stringent incinerator rule, which is also more protective of the environment than chapter 434.
